DETAILS

Inspired by the rich geometric patterns of Moroccan designs, this wall sconce uses perforations to enhance its etched forms, spread across a hand-hammered surface, finished in rich, antique gold.

- Crafted of hammered iron
- Hardwire fixture, professional installation recommended
- Made in India

CARE

- Dust regularly with a soft, dry cloth.
- Avoid the use of harsh cleaners and abrasives which may damage the finish.

Reference our [Measuring & Delivery Guide](#) to accurately measure your space and avoid common delivery issues.

IMPORTANT SAFETY INSTRUCTIONS

1. We recommend installation by a licensed electrician.
2. To avoid the risk of fire, do not exceed the recommended wattage for this light fixture.
3. This fixture has been rated for up (2) 40 watt maximum type B bulb.

WARNINGS

1. Do not remove the lamp from its packaging by pulling on the power cord as a bad connection may result.
2. To avoid the risk of fire, electrical shock, or personal injury, turn off the lamp and allow it to cool prior to replacing light bulb(s).
3. Do not touch the bulb when fixture is turned on or touch directly at light bulb.

ASSEMBLY

1. Carefully remove all parts from the box and remove all protective coverings.
2. Turn OFF power to the junction box where the lamp will be installed.
3. Drill pilot holes into the marked mounting bracket (F) location. Use the provided wall Anchors (A) for screws (D) to secure the wall and screw it for mounting bracket (F) to the wall.

Important: A perfectly flat wall is required for proper hanging. If your wall is not flat, you may need to place thin shims behind the bracket to accommodate. Use a level or a straight edge on the face of the mounting bracket to check for high/low points, until the bracket is perfectly flat.

4. Pull wire from Wall outlet box, and attach ground wire (usually green or- bare wire) from wall box to ground wire with a screw.
5. Attach hot wire from Wall (usually black) to hot wire on fixture with a plastic wire connector (E) and wrap this connection with electrical tape.
6. Attach neutral wire from Wall box (usually white) with neutral wire on fixture with a plastic wire connector (E), and wrap this connection with electrical tape.
7. Insert (2) 40-watt max type A bulb (C) (not included) as shown in picture, into the socket (B).
8. Hang your Wall Lamp by lifting it onto the mounting bracket (F). Once hung, the Wall Lamp can be slid slightly to the left or to the right for perfect positioning.
9. Restore power to the junction box and test lamp fixture.
10. Installation is complete.
